KJAS

Students show their own personal masterpiece with symbols and signs for their family history.

Fourth Graders at Vista Academy of Jasper investigated the history and symbolism of the Great Seal of the United States located on the back of a dollar bill – something seen and often overlooked each day of our lives. After exploring those details, they then created their own Family Seal, which included locating the meaning/origin of their family name, creating a picture to symbolize their family, and creating a family motto.

This is part of a unit, "Renegades, Rebels, and Revolutionaries" that allows students to get to know some of the history of our country with its ups and downs. Through a better understanding of our civilization, students gain a better understanding of themselves.

One fourth grader is very proud of her work.!
